

Leaking...

Problem: The Pipe, Joint, sprung a leaking.

Precaution: Switch of your water mains, before attempting to fix anything. Secondly if its a hot water pipe, switch off your geyser and give it some time to cool down.

Intermediate Solution:

- If your pipe is leaking, its suggested that you place a pipe patch as temporary measure.
- Other quick and easy temporary measures for stopping pipe leaks include wrapping waterproof tape over the bad spot or rubbing the hole with a stick of special compound.

Final Solution: If you tried the above and it doesn't work **CALL A PLUMBER!** A general rule of thumb to follow, is that if you don't have the right tools at home to fix its better you don't, and rather call a professional! it could cause even more damage, that would require breaking to repair or replace, to fix the problem, and might just leave you with a flooded house and no water until a plumber can come out.
